

**For our office in Ismaning (NEXUS / Astraia GmbH) we are looking for an  
Analyst (m/f/d) in the area of quality assurance**

As a company with customers and partners in over 70 countries worldwide, we offer solutions for demanding users in the specialized medical field. We attach particular importance to intensive and competent customer care. Our products and our service are characterized by high quality and flexibility. This claim, as well as the great commitment of every employee, have been the basis of our success for 20 years now. Visit our website at: <https://www.nexus-astraia.com>

**Your job:**

- + Working with the business leader and highly trained and committed colleagues to optimize and ensure the quality of our medical product „astraia software“
- + Defining methods and workflows to ensure an efficient, productive and high-quality way of working
- + Developing solutions by analyzing and collecting data from the assurance system
- + Building and managing systems for test automation with modern tools (e.g. Eggplant, Squish)
- + Helping to further build and support the process and the environment of the quality assurance system
- + Supporting our product management and our software development during the life cycle of our medical product

**Your profile:**

- + University degree in an engineering / natural science discipline or professional IT education or career changer with relevant work experience
- + Experience in (Microsoft) communication and information systems
- + Outstanding analytical skills and comprehensive understanding of processes as well as affinity to topics in the area of quality assurance
- + Strong communication skills with ability to interact effectively with all internal and external partners
- + High degree of management skills including work planning, quality control, and client management
- + Additional experience in healthcare software application is appreciated
- + Fluency in English and German

**We offer:**

- + A challenging position in process- and product-oriented quality assurance in the future-proof medical sector
- + New challenges and exciting projects to optimize our medical product
- + Flat hierarchies and an open-minded, international team with whom you will jointly design and develop new solutions
- + Personal training, in-house training and workshops, access to external learning platforms
- + A modern working environment and the possibility of remote working
- + High-quality technical working environment with personalized workplace at the location
- + Free coffee and water as well as other attractive corporate benefits (e.g. bicycle programme, company pension scheme, Nexus share programme, etc.)

**Next step:**
